

Engaru Town, Hokkaido, Japan

Maruseppu Insectarium

Welcome to Our Insectarium; Museum of living Insects.

We show many Insects and small Animals throughout the year.

You can see more than 100 living species.

We have three areas of living Insects, as below

Butterfly garden

About 300 butterflies are flying in green house, throughout the year.

They are from Okinawa, Southern Japan.

So we show some insects and living things from Okinawa, also.

World Beetles

Over 30 species of world wide "Living" beetles and other animals, you can see.

Insects in Maruseppu

Many insects and animals habits in Maruseppu, Northern Japan.
We introduce a part of their Living style.

The life time of insects are very short, so we are breeding and changing them very often.

Other room or corner

Kid's room/ craft room

Here you and your children can enjoy videos or make crafts (folding paper, etc.)
You can relax without your shoes.

For 0–2 age babies (infants)

We made “kids circle”, nursing corner
(if you feel uncomfortable, we rent other lockable room),
and diaper changing bed.

Learning corner

Many books and specimens will support your learning.
And we introducing seasonal information of fields around our Insectarium.

If you feel some difficulty, please ask the staff!

And you can enjoy more activities.
Our English is not good.
But, we are trying to assist you as we can.
